## CRAFT BREWHOUSE 20 HL MULTIVESSEL

**This type of brewhouse is primarily designed for continuous beer production. The number of vessels is variable from three to six pieces, depending on the number of brew per day.**

**Brewhouse can be designed with a linear or circular placement. In addition, the brewhouse can be equipped with an integrated CIP station. This design allows a high level of automation.**

**All known types of beer can be produced here, including the use of adjunct (malted substitutes). The size of brewhouse ranges from 10 hl. The maximum volume per brew is 50 hl.**
